

Access: CDec Function

Question: How do I convert a value to a decimal number?

Answer: To convert a value to a decimal number, use the "CDec" function. The syntax for the CDec function is:

CDec(expression)

For example:

```
Dim LDecimal As Double
```

```
LDecimal = CDec(8.45 * 0.005 * 0.01)
```

The variable called LDecimal would now contain the value of 0.0004225.
