

# Access: Len Function

---

In Access, the **Len** function returns the length of the specified string.

The syntax for the **Len** function is:

Len ( text )

*text* is the string to return the length for.

For example:

Len ("techonthenet") would return 12.

Len ("Wednesday") would return 9.

Len ("apple pie") would return 9.

## VBA Code

The **Len** function can be used in VBA code. For example:

```
Dim LResult As Long
```

```
LResult = Len ("www.techonthenet.com")
```

In this example, the variable called LResult would now contain the value 20.

## SQL/Queries

You can also use the **Len** function in a query.
